Who are we?

KATIKA SAS is a digital technology company made up of a team of experts who, thanks to its IOT (internet of things) department offers to companies and individuals the remote solutions needed for the security and management their vehicles.

Our Objectives

To continue to put our experience at the service of individuals and entities by providing them with simple and secure solutions that facilitate the management of vehicles while allowing it to increase its productivity, reduce time loss and expenses related to their maintenance.

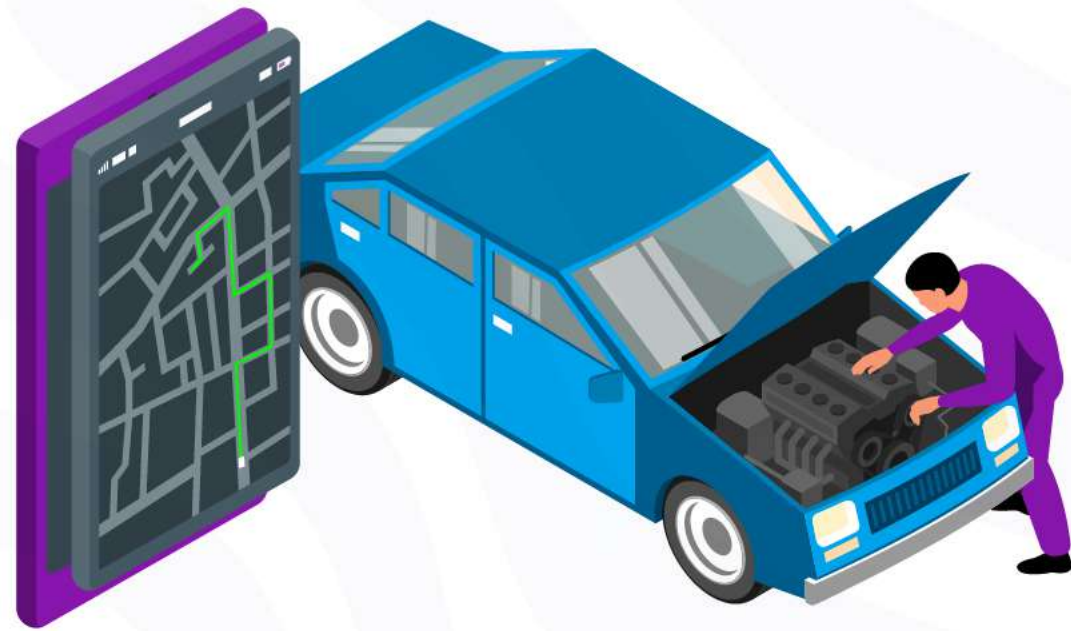

Overview of Internet of Things (IoT)

Our geolocation service is focused toward all types of vehicles. Provided by our I.O.T. department, it is based on the use of HARDWARE and SOFTWARE equipment specifically designed for fleet management.

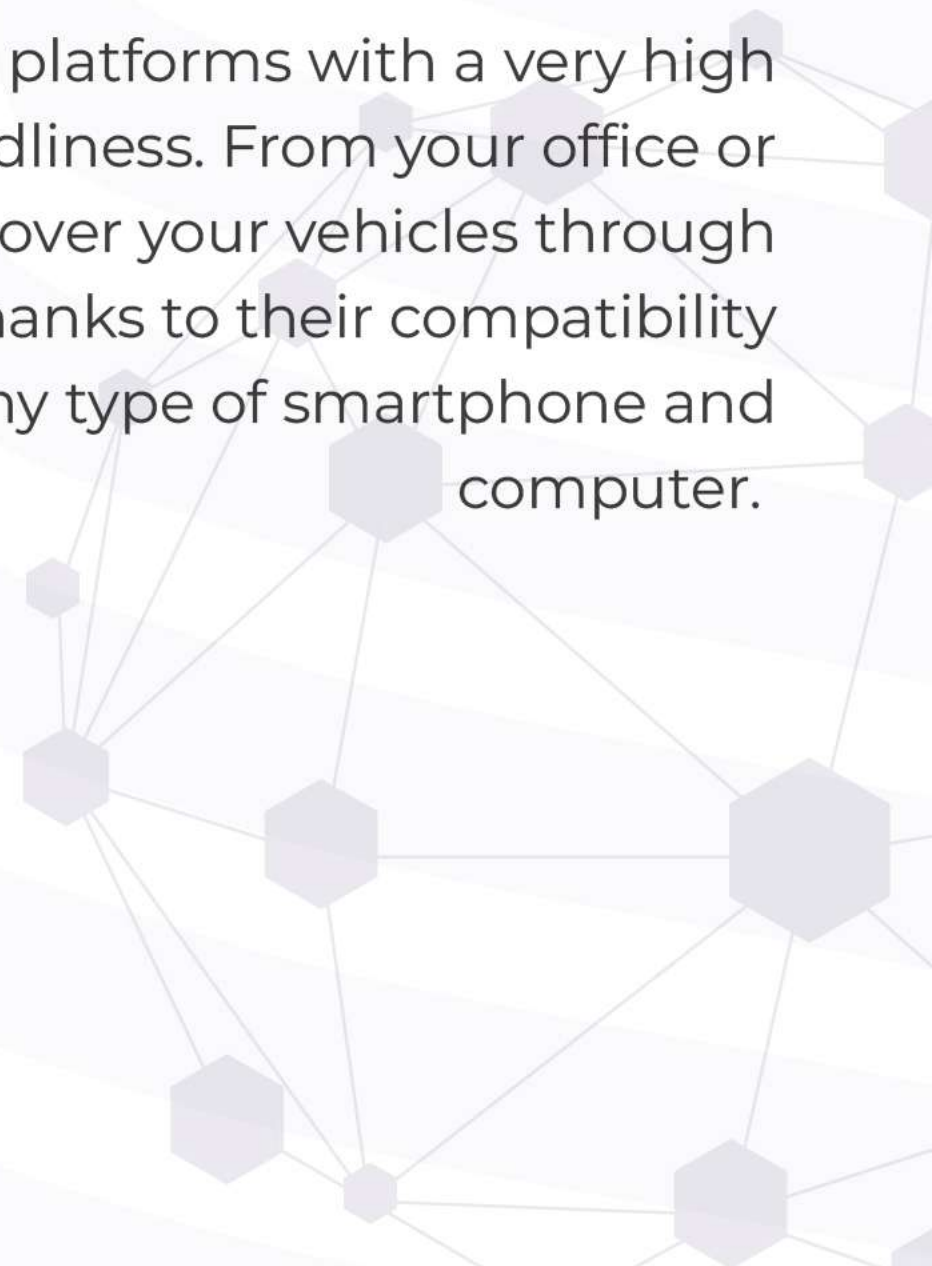

1. Hardware equipment

We provide you with robust and easily concealable GPS plotters that allow you to track your vehicles all over the world.

2. Software equipment

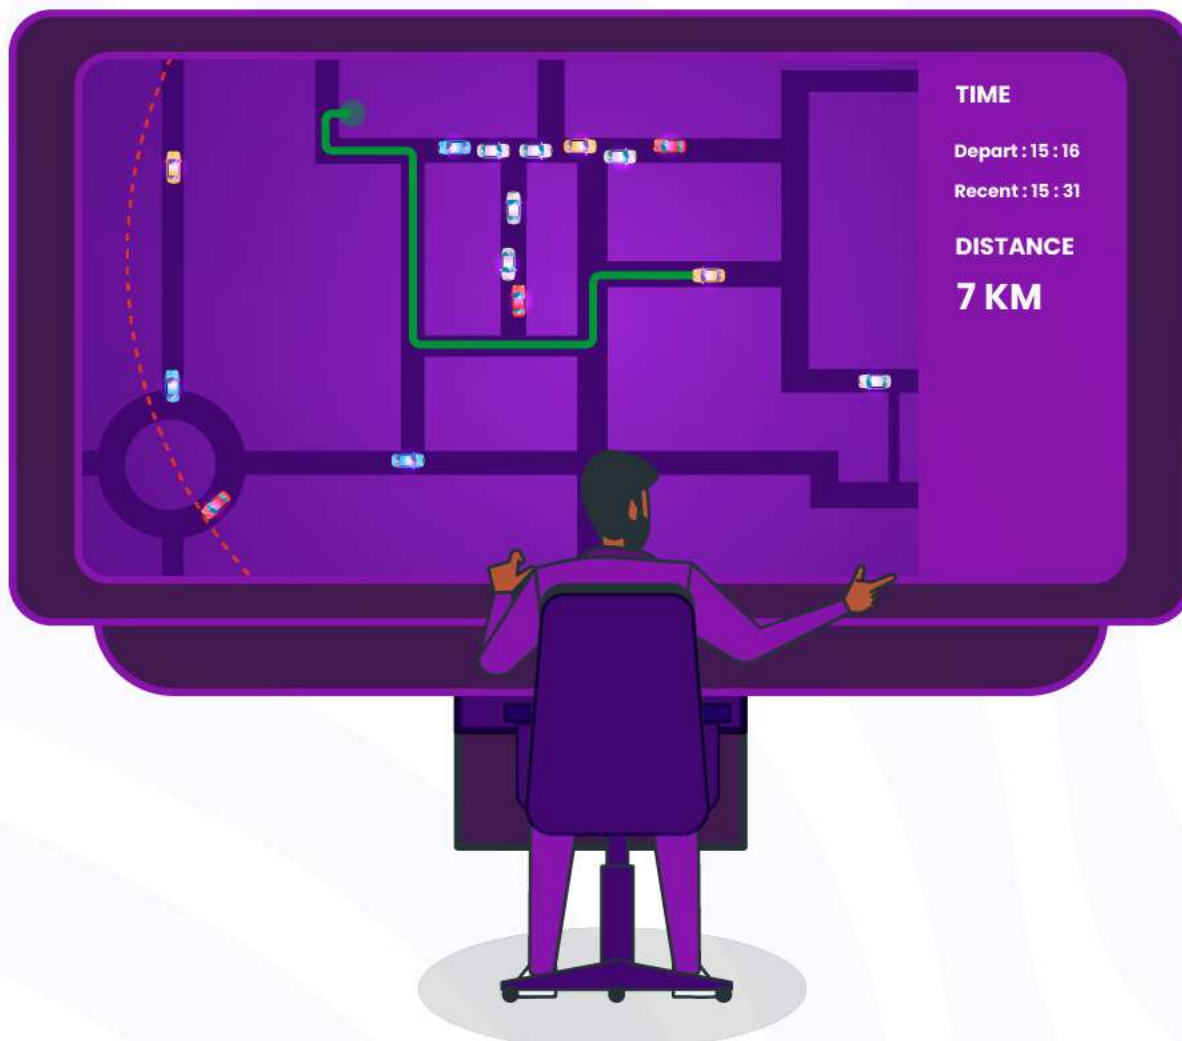

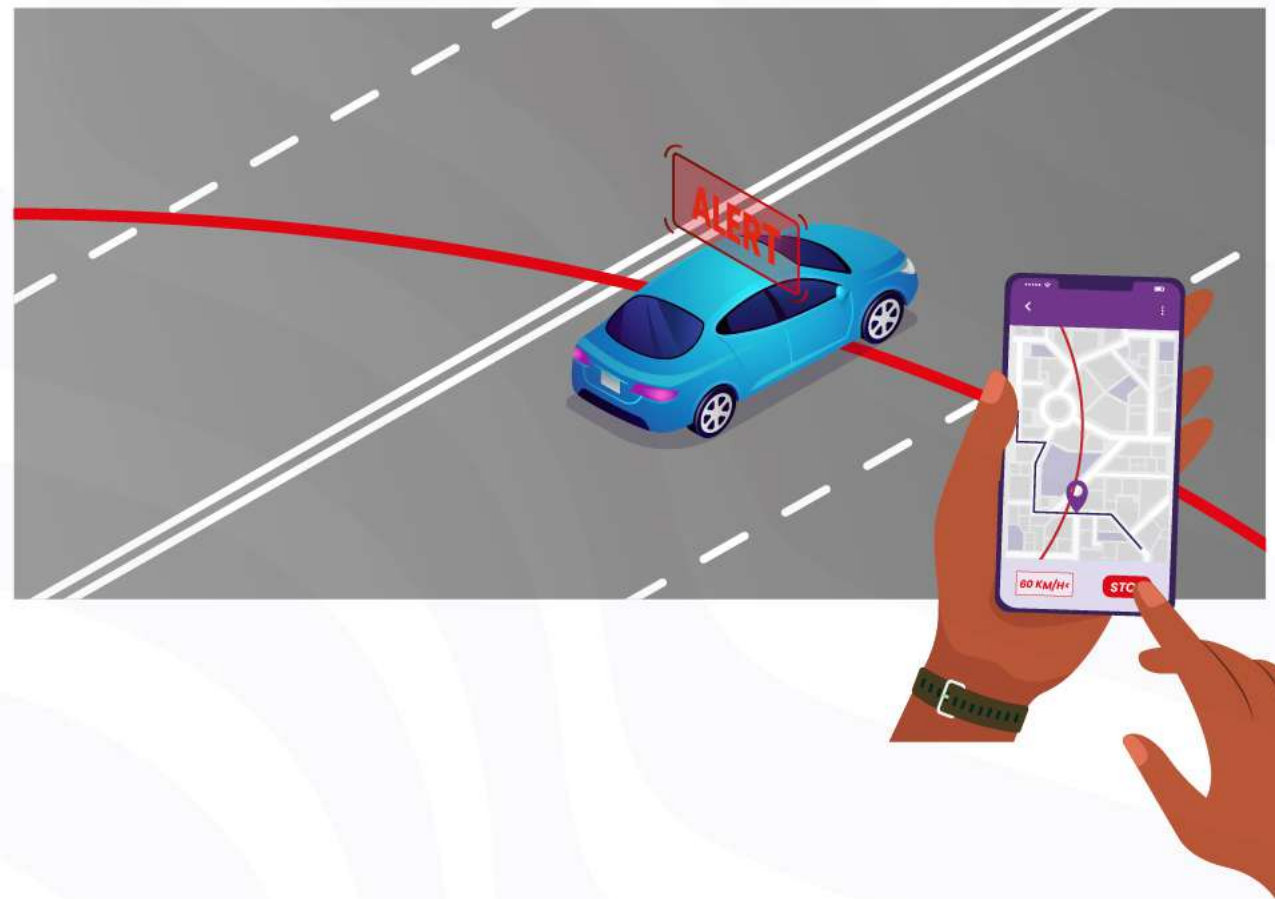

We offer geolocation platforms with a very high level of user-friendliness. From your office or home, have control over your vehicles through our platforms thanks to their compatibility with any type of smartphone and computer.

HOW DO WE HELP YOU CARRY OUT YOUR TRANSPORT-RELATED ACTIVITIES?

Ensure the safety of your mobile equipment

With our equipments, We give you the possibility to be informed of suspicious driving and to act in case of theft by stopping the engine of your vehicle remotely.

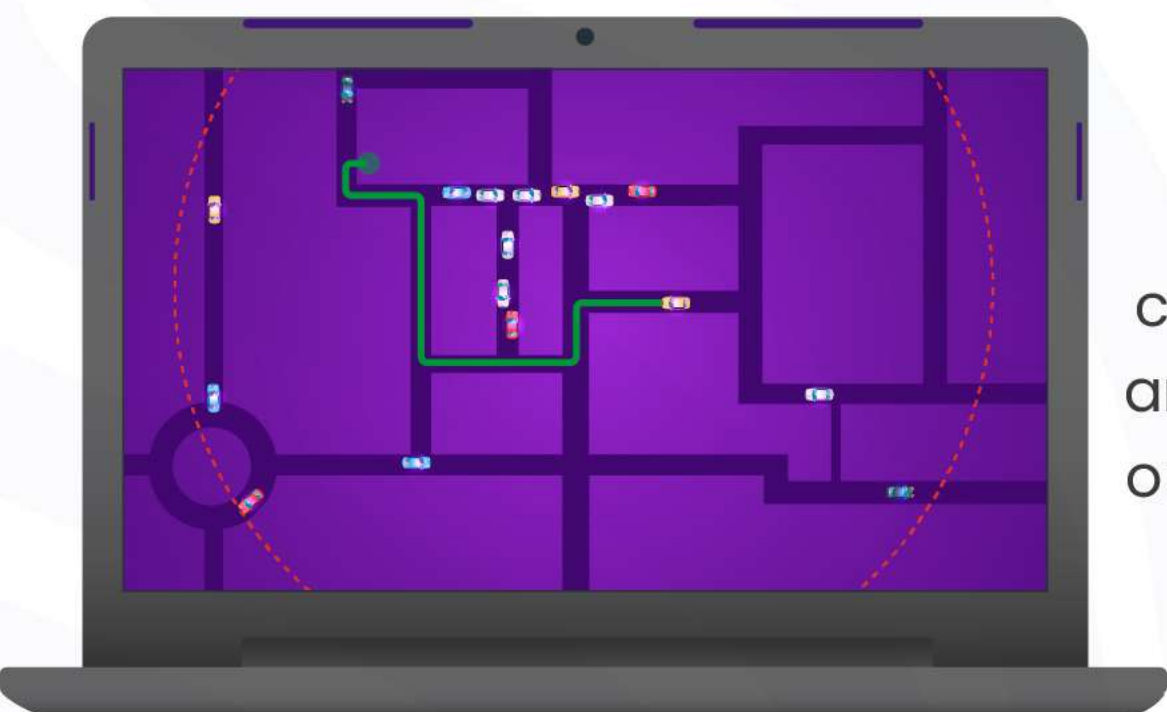

Traffic History

Our system allows you to track your vehicle's path, mileage, stop times, and the number of stop times as well as the duration of parking whatever the period.

HOW DO WE HELP YOU CARRY OUT YOUR TRANSPORT-RELATED ACTIVITIES?

Fuel consumption monitoring

If, until now, you have had difficulty taking track of the fuel consumption of your vehicles, relax, because our equipment will do it for you through the dashboard containing the consumption, refueling, and distance covered by each of your vehicles.

Save time on your deliveries

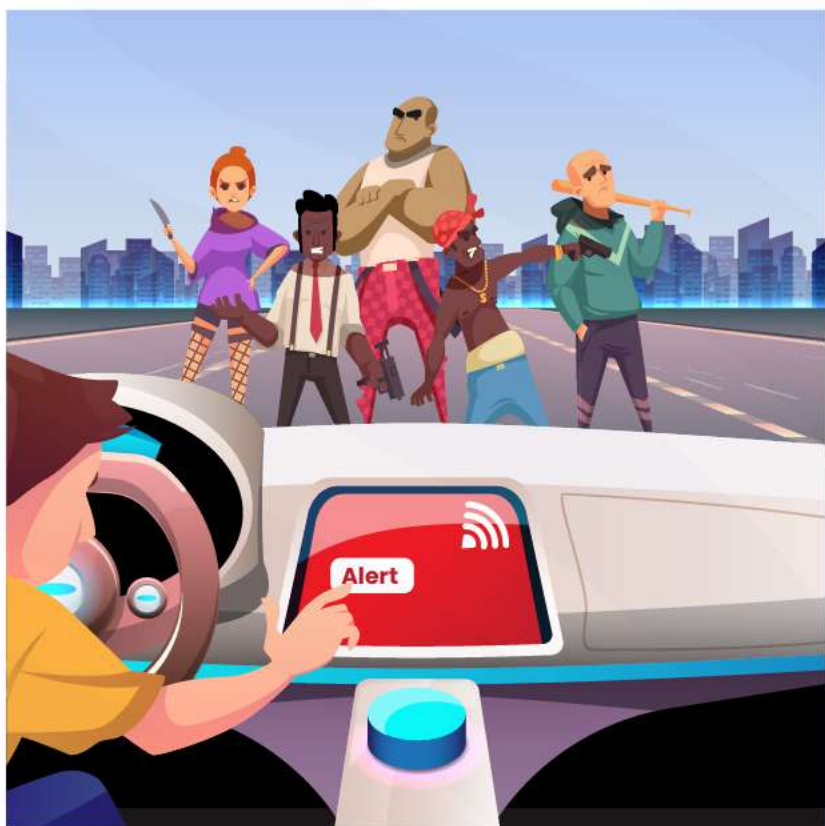

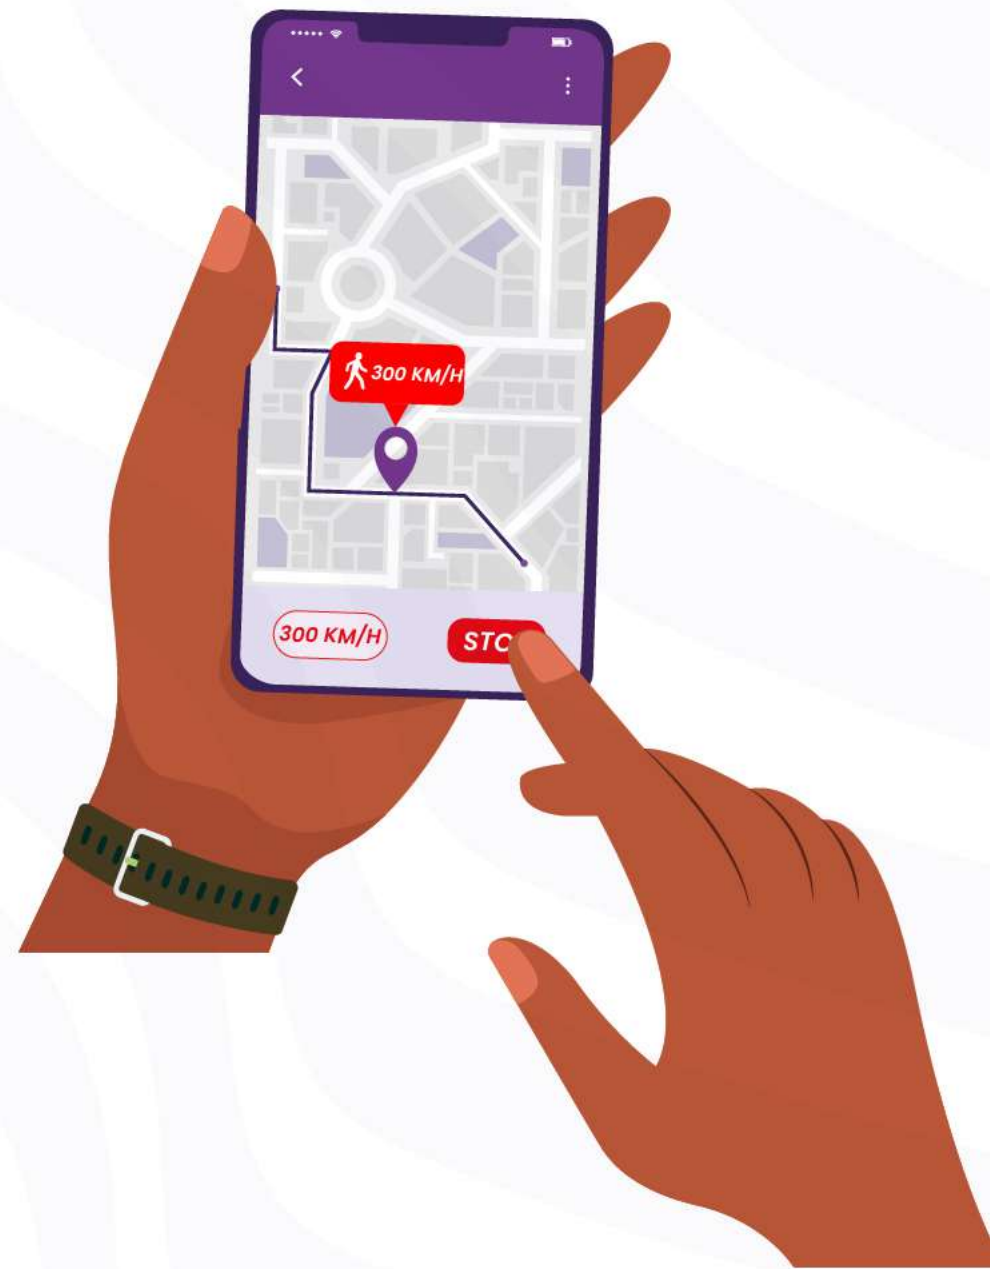

In transport, road traffic is one of the constraints that can slow down activity and therefore financial gains. Thanks to our platforms, be informed of the traffic conditions on the main roads and organize your paths easily.

HOW DO WE HELP YOU CARRY OUT YOUR TRANSPORT-RELATED ACTIVITIES?

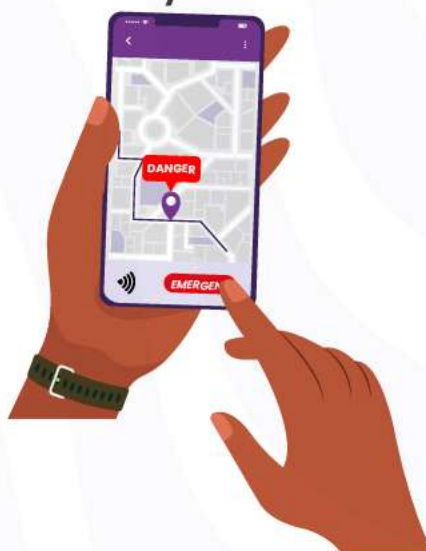

Stay alerted

Irresponsible driving can lead to incidents and affect your company's productivity. That is why you are informed through our platforms of cases of overspeeding by your drivers and of crossing the safety zone that you have predefined.

Preventing distress

Late-night driving is still very risky in some areas. Recognizing this, we permit your driver to send you a distress signal with a single click on a button connected to our equipment.

Advantages of KATIKA IOT

- ★ No installation fees to pay, you only pay for the service.
- ★ Equipment and installations guaranteed for 6 month: during this period, KATIKA SAS assumes any faulty installation of the geolocation system.
- ★ Our GPS units contain a personal battery which allows them to function even without the vehicle's power supply.
- ★ Reduction of operating costs.
- ★ Notify the control center in case of distress

Advantages of KATIKA IOT

- ★ **Best quality/price:** According to the general opinion of our partners about our SG, we offer a low-cost product available to all (individuals and companies).
- ★ **Customer care:** we have,
A mobile application that we install on smartphones to allow customers and the engineers to monitor their vehicles or fleet
An online platform to monitor the vehicles 24h/24h. This allows us to have better constant security on your vehicles or fleets
- ★ **Clear and respected service contract:** At purchase, we sign a contract that clearly sets out our responsibilities as well as the provisions in the event of a breach and we always respect our word.
